Summary

I am passionate about software development and I am committed to continuously learning and improving my skills. I enjoy working on personal projects that allow me to explore new technologies and apply my knowledge in algorithms, data structures, design patterns and web design. In addition, I am interested in keeping fit and exercise regularly. My goal is to master computer science and turn my knowledge into practical

Skills

Front-end: HTML • CSS • JavaScript • TypeScript • React • Bootstrap

Back-end: PHP • MySQL • NodeJS • Express • Tool / Technology

Version controller: Git • GitHub

Experience

Temporary Project

Ambato, Ecuador

Full stack

03/2024 - 05/2024

- I developed an interactive website for a temporary project, implementing HTTP protocols and REST APIs for frontend/backend communication. I used AJAX and Fetch for asynchronous requests, and applied security measures against SQL injections, XSS, and CSRF. I managed relational databases with SQL, including subqueries, transactions, and CRUD operations. Additionally, I developed file management features and used Bootstrap for responsive design. I coordinated with the team using Git, GitHub, and project management tools.

Education

Universidad Técnica de Ambato

Ambato, Ecuador

Software Engineering

2021 - Present

Languages

Spanish - Native

English - A1

Passions

Algorithms
